

RAFAŁ GRAJEWSKI

I don't just search for a job. I've built a system to find it. I discovered your opening with my very own platform, flowjob.it - the exact tool that also generated the CV you are reading right now.

EXPERIENCE

flowjob.it | Side project

2025 – PRESENT

Architecting an end-to-end job-matching platform driven by Python web scrapers and automated data pipelines. Leveraging AI methodologies (Cursor, Antigravity, LLMs) to accelerate full-stack development, alongside GitHub for version control. A core focus is the AI-driven extraction and normalization of unstructured job skills into a standardized taxonomy. Managing the full product lifecycle—from concept to iterative AWS deployment—transforming raw web data into a scalable, cloud-hosted solution.

Business Analyst | Amazon

2024 – PRESENT

I support large-scale mass recruitment across Europe, covering hundreds of thousands of employees. I own the technical analytics layer built on Amazon Redshift, where I design and optimize complex SQL queries, develop scalable data transformations and reporting models, and ensure high performance and data quality. I also design and deliver dashboards based on structured datasets to enable clear, data-driven decision-making across regions.

Workforce Staffing Manager | Amazon

2022 – 2024

Directed high-volume workforce operations and vendor management to ensure operational capacity at scale. Acted as a key strategic partner to Senior Leadership and cross-functional teams, aligning staffing and marketing strategies with core business objectives. Drove data-informed capacity planning by forecasting attendance and attrition metrics. Additionally, I identified operational bottlenecks and led the testing and rollout of internal IT/HR tools to optimize workforce tracking and efficiency.

Workforce Staffing Specialist | Amazon

2021 – 2022

Associate Partner | Amazon

2018 – 2021

Training Support Specialist | Presscom
